

**SITUATION:** Integration concerns regarding MS Dynamics™ GP and Budget Maestro. A need to facilitate and automate routine processes.

**SOLUTION:** Link Maestro for MS Dynamics™ GP.

**REASON:** The first, seamless interface for data transfers from MS Dynamics™ GP, enabling the benefits of Budget Maestro budgeting and forecasting capabilities for organizations currently utilizing Microsoft Dynamics accounting software.

---

**What it helps you do:**

- Enjoy complete flexibility, eliminates cutting and pasting of actuals for variance analysis; eliminates Excel importing
- Save hours of redundant work and eliminate data entry errors
- Fast and accurate data transfer of Chart of Accounts and historical trial balance information from Dynamics GP to Budget Maestro within a single or multiple company scenario, at the touch of a button
- Helps you to set up your company structure and Chart of Accounts in a snap without relying on IT
- Gain a comprehensive understanding of your business from the historical view (your accounting system) synchronized with forward-looking views (budgeting and forecasting)
- More tightly integrate between business plans and actual results, improving performance accountability

## Features:

- 'One click' data import into Budget Maestro – for model set-up and to synchronize accounts.
  - Import your accounts 'naturally' from your general ledger
  - Import one or multiple accounts and balances from different Dynamics GP instances
  - Import multiple accounts and balances from multiple General Ledgersystems (Dynamics GP, Sage MAS 90/200, Quickbooks)
  - Import monthly "trial balance (actual) for up to 12 periods in one import
  - Import monthly 'trial balance' (actual) for any fiscal calendar year
  - Import non-financial balances
- Optional capability to have Budget Maestro automatically build your Organizational Hierarchy based on your account segmentation.
- Import monthly End Balances into Budget Maestro to:
  - Develop 'what if' scenarios
  - Generate a reforecast

## Think about what you could do with a tool that:

- Enables better management decisions, while eliminating manual, multi-step processes, automatically transferring the Chart of Accounts and trial balances.
- Allows users to generate accurate variance reports more quickly to better measure performance against plan.
- Saves you painful data entry hours, minimizing the chance for errors via a connection between software systems.
- Ensures complete data integrity.
- Helps you plan and measure performance with greater accuracy and agility in a time sensitive economic environment.
